

Trusted servers to meet your organization's growing demands

HPE ProLiant rack and tower servers:

- ✓ Redefine compute economics by delivering more computing and storage capacity. Their right-sized compute with flexible choices lower computing energy and floor space consumption.
- ✓ Deliver best-in-class performance with maximum expandability and reliability.
- ✓ Include a comprehensive management suite with proven configurations that provide improved

energy efficiencies, lower your total cost of ownership (TCO), and are backed by industry-leading support.

- ✓ Component redundancies ensure maximum up time and prevent data loss.
- ✓ Standard 3-year next business day onsite warranty. Warranty upgrades available to increase the length of coverage and provide faster response times.
- ✓ HPE servers provided by DEVNET include HPE iLO smart hardware monitoring, failure notification, and

remote management. They feature no-down-time hot-swap-redundant components, including hard drives, power supplies, and cooling fans.

DEVNET Managed Services

- ✓ Keep your network running predictably, optimally, and securely.
- ✓ Provide day-to-day management of your server and network resources.
- ✓ Offer three levels of service ranging from automated monitoring to full disaster recovery.
- ✓ Include server hardware, Windows server OS, Active Directory, SQL server, backup, antivirus, Windows update, security, firewall, and network switch maintenance and management.
- ✓ Flat rate fee-based service levels and equipment coverage.

DEVNET Managed Cloud Backup

- ✓ Provides secure offsite backup of your data and systems.
- ✓ Encrypts data before being backed up over a secure connection to a secure data center.
- ✓ Tier-IV data centers are all SSAE-16 compliant.

- ✓ Data-only and full system backups.
- ✓ Bare metal restore.
- ✓ Customizable to meet client specific needs.
- ✓ Drive Express service gets you up and running quickly and allows faster disaster recovery.
- ✓ Supports VMware, Windows, Microsoft SQL, Exchange, and SharePoint.

HP Workstation

- ✓ DEVNET offers the full line of HP workstations and laptops.
- ✓ HP Essential desktops are business-ready and budget-friendly solutions.
- ✓ The HP ProDesk and ProBook provide greater performance for heavy workloads and increased warranty over the Essential line.
- ✓ The HP Z workstations and ZBooks offer maximum performance for resource-hungry applications.
- ✓ HP desktops and laptops are backed by a 1 to 3 year next business day onsite warranty (depending on the product line). HP CarePacks offer extensions and improvements to the standard warranty, including accidental damage protection.

Scanners, Printers, and Barcode Readers

- ✓ The Fujitsu fi Series scanners provide high-quality high-speed scanning. The fi Series offers sheet-fed, dual sheet-fed/flatbed models for paper sizes up to 11x17.
- ✓ Fujitsu scanners come with a 3 month onsite or 1 year advanced replacement warranty (depending on model). Warranty extensions are available.
- ✓ Epson check scanners are specifically designed for fast, accurate scanning of checks and come with a two-year warranty.
- ✓ Epson receipt/slip/validation printers provide reliable receipt, check endorsement, and document stamping functionality.
- ✓ Honeywell barcode readers quickly and reliably read even poor quality barcodes.

HP Printers

- ✓ HP business class printers offer fast professional quality output at budget-conscious price.
- ✓ HP printers come with standard 1-year warranty. HP offers enhanced warranties to extend coverage period and decrease response time.
- ✓ DEVNET offers a variety of business-class HP printers, from individual laser and ink printers to large department scale network multi-function printers. We help you find the right product to fit your needs.

HPE Switches

- ✓ From small unmanaged fixed configuration switches to large modular datacenter models with advanced Layer 3 features.
- ✓ Provide high performance, a competitive price, and come with a limited lifetime warranty.

Watchguard Firewalls

- ✓ Provide reliability, performance, configurability, and enterprise-grade security features at a competitive price.
- ✓ Offer multiple levels of protection: basic Denial of Service (DoS) attacks, fragmented and malformed packets, Intrusion Prevention Service (IPS), antivirus, reputation-based defense, content access control, and data loss prevention.
- ✓ Provide secure VPN remote access.
